

OUTDOOR LIVING

OUTSIDE IS THE NEW INSIDE

At Arkitan Outdoor Living, our aim is to redefine your outdoor spaces by flawlessly combining aesthetics, functionality, and comfort, providing you with a lifestyle that can be enjoyed all year round.

Our mission is to transform outdoor spaces into an integral part of your lifestyle and identity, rather than just a space. In line with this, we create aesthetically appealing, functional, and comfortable spaces.

Our vision is to provide you with outdoor spaces that are innovative, aesthetically rich, and usable year-round, offering you the opportunity to spend every moment of your life outdoors.

WHAT WE DO

At Arkitan Outdoor Living, we aim to elevate your outdoor living experience by seamlessly blending indoor comfort and aesthetics. Our services prominently feature Pergola Systems and Glass Enclosures. We create outdoor spaces that defy the seasons with modern, durable, and advanced pergola systems.

Carefully designed for both aesthetics and functionality, our pergola systems transform your outdoor space into a year-round living area where you can enjoy every season. We are proud to be an authorized dealer of Schildr, ensuring that our customers receive top-quality products and service excellence.

Additionally, we complement your outdoor spaces with ready-made outdoor furniture and offer custom-made movable furniture solutions for your large projects. In line with our slogan "Outside is The New Inside," we meticulously plan every detail, considering your outdoor spaces as an extension of your indoor spaces, and provide you with the best solutions.

Why Choose Us?

EUROPEAN QUALITY

All our products are manufactured in Europe. By upholding European standards in every aspect of production, we prioritize quality, reliability, and innovation in all that we deliver.

ALL SEASONS

Our products are designed for year-round use, capable of withstanding intense sunlight, rain, and snow. This durability ensures longevity and reliability in any weather condition, providing peace of mind to our customers.

REMOTE CONTROLLED

We collaborate with Bond Bridge, a wireless device that links your remote-operated aluminum louvers, motorized shades, dimmable LED lights or ceiling fans to your WiFi network. This allows you to manage remotely using smartphones or tablets from any location.

CUSTOM DESIGN & FINISHES

Our products are produced entirely as custom-made, unlike our competitors. Tailored to your needs, we offer a variety of sizes and configurations. Select from an extensive range of colors and textures to personalize your finishes.

PROFESSIONAL INSTALLATION

We take pride in partnering with licensed contractors who are experts in their field. Our commitment to excellence ensures that your project is completed to the highest standards, providing you with the peace of mind you deserve.

WARRANTY

We provide a lifetime warranty for aluminum extrusions, along with 5-year coverage for motors and accessories, and 2-year coverage for LED or RGB lights.

OUR STORY

Onur Kamil TAN owner, architect
Merve TAN co-founder, architect

M. Arch. Onur Kamil Tan took his first steps in the architecture industry in 2004. Throughout this journey, he served in various prestigious architecture and interior design firms. In 2013, he established his own interior design company in Istanbul, setting out to bring his design visions to life.

In addition, he collaborates with his experienced architect wife, M. Arch. Merve Tan, in managing Arkitan Architecture, which they founded in Turkey. They specialize in both design and turnkey projects in the interior design field. To extend their expertise in this field to the outdoors and embark on a fresh creative adventure, they founded Arkitan Outdoor Living in California.

Contact us for more information and discover the difference with Arkitan Outdoor Living. We are eager to offer you the opportunity to redefine your outdoor spaces.

POLAD

Comfort wrapped in shield

There is no need to carry the realities in your dreams. Comfort wrapped in shield. Polad system, designed by talented Schildr engineers known for their innovative approaches, stands as a pioneering winter garden model that seamlessly blends classical and modern design elements. In many regions, the challenge of varying back heights during winter garden assembly is a common issue. Steel structure embedded in aluminum profiles addresses this concern by ensuring an equal load distribution across the floor, which makes it different from numerous other winter gardens. Depending on the spacing between the supports, it allows for a convenient connection of the system's perimeter with panoramic sliding systems. A well-conceived water channel integrated throughout the system efficiently and quietly directs excess water out through a plastic conduit. This model offers users superior comfort, clear panoramic views, excellent illumination, year-round usability, and direct communion with nature.

WINTERGARDEN / SUNROOM

Elevate your outdoor experience with Arkitan Outdoor Living!

LANAI

Compete with the seasons

Created by skilled engineers, the Lanai retractable louver system offers unparalleled functionality for year-round comfort. With the motorized operation, the roof can be effortlessly pivoted up to 90 degrees or completely retracted, allowing for up to 50-60% openness and adapting to the changing seasons. Optional insulation foam inserts are available to minimize raindrop noise and reduce heat transfer on scorching, sunny days. The ceiling's LED lights can be customized to any desired length, while the optional functional lighting along the system's perimeter adds a captivating allure to the Lanai during night time. Electrical cables within the system meet UL listing standards. To further elevate the comfort within the designated area, Schildr has developed sliding glass systems and ZIP technology shades that can be seamlessly integrated with the Lanai.

“
**OUTSIDE
IS THE
NEW INSIDE**

We are dedicated to redefining your outdoor living experience by seamlessly integrating the beauty of outdoor spaces into your everyday life. With our outdoor enclosure systems made of glass and aluminum, our products expand the living space without extensive construction and enhance the property's value.

Our primary objective is to provide year-round opportunities for people to enjoy the sun and create memorable moments. We develop and produce various solutions including sunrooms, bioclimatic pergolas, retractable pergolas and sunshades. Additionally, we offer extra accessories such as glass window & door systems and outdoor furniture.

Explore our range of services and products designed to elevate your outdoor experience to new heights.

PERGOLA

Leave the sun behind

The AVANTGARDE Retractable Pergola System offers the widest coverage among retractable pergola systems, spanning an impressive 32 feet from the wall to the post. This system can be easily adjusted to accommodate various widths and its aluminium profiles and stainless steel joint materials ensure exceptional durability, prolonging its lifespan. The roof, crafted from a composite material coated with vinyl (Soltis Proof 502 by Serge Ferrari), is reinforced by connecting it to the aluminum profiles. Opening and closing the roof is effortless, thanks to belts connected to a motor (Somfy) through the aluminum profiles and runners. Additionally, the dimmable LED lights (Samsung), powered by 24V, can be personalized to meet specific brightness requirements.

CABBANA

Direct the sunshine

The Louvered Roof Cabbana model, meticulously crafted by professional engineers, is designed to offer clients optimal comfort throughout all seasons. Constructed entirely from aluminum, this versatile system can be installed as a single unit or combined with multiple units (2, 3, or 4) for expanded coverage. By utilizing a remote control, the aluminum louvers on the roof can be adjusted to open up to 90 degrees, ensuring suitability for any weather conditions. The single extrusion aluminum post and structural gutter profiles provide a robust foundation for the Cabbana system, and their dimensions can be tailored to meet location-specific requirements, including demanding snow load regulations. The LED lights on the ceiling can be customized in length, while optional functional lighting along the perimeter adds a delightful ambiance to the Cabbana during night time. All electrical cables integrated into the system adhere to UL listing standards. The Cabbana can also be equipped with Schildr's sliding glass systems and ZIP technology shades to enhance comfort.

PANORA

Live the nature within your home

Panora system, a one-of-a-kind winter garden that offers unparalleled panoramic views and a sleek, unobtrusive design combining single or double glass glazing, tailored to match the local climate, with a sturdy aluminum frame for structural integrity. The glass features an imperceptible slope, while the roof's glazing profiles facilitate the smooth drainage of water into the built-in gutter system and out through the posts. The incorporation of PVC pipes within the posts ensures that water remains outside the system, preserving its longevity. The LED lights on the ceiling can be customized in length, and the optional functional lighting along the perimeter adds a unique charm to Panora at night. All electrical cables throughout the system are UL listed. To increase comfort year-round, Panora can be equipped with Schildr-designed sliding glass systems and cutting-edge ZIP technology shades.

ARKITAN LLC IS OFFICIAL DISTRIBUTOR OF SCHILDR GLOBAL IN SOUTHERN CALIFORNIA

Manufactory and Secure Packaging

Our manufacturer, Schildr (2007) is a manufacturer of sunrooms, pergola systems, exterior enclosure systems made of glass or aluminum. Our packaging experts have meticulously crafted each solution to provide unparalleled protection during transit.

OUR SERVICES

01. CUSTOM MADE ALUMINUM PERGOLA SYSTEMS
